NATURE DETECTIVE

Field Journal

Plants, reptiles, and amphibians of North Carolina

SPECIMEN LABEL

Field scientist: _____

Journal started: _____ **Finds logged:** _____

If found, please return to the DDMES Science Olympiad binder shelf.

How a nature detective works

Scientists who study reptiles and amphibians are called **herpetologists** (hur-peh-TOL-oh-jists). Plant scientists are **botanists**. This journal is your field notebook, and it lives in your SciOly binder.

1
LOOK
Walk slowly. Check tree trunks, leaf piles, logs, pond edges, and sunny rocks.

2
CLUES
Leaf shape, edge, and bark. Skin, legs, shell, and color.

3
SKETCH
Draw it big and label 3 clues. Rub a leaf or bark.

4
NAME IT
Use the Tree chart and Herp Collector pages.

5
LOG IT
Fill in a Field Find page and add it to your Life List.

The Field Scientist Code

- [ ] Watch herps from a distance. **Never** touch or pick up a snake.
- [ ] Leaves of three, let it be! Learn poison ivy before you pick any leaf.
- [ ] Pick fallen leaves when you can. Ask before picking from a living plant.
- [ ] Roll logs **toward** you, look, then roll them back gently.
- [ ] Amphibian skin is delicate: look, don't hold. Wash your hands after a hike.
- [ ] Only explore near water with an adult. Check for ticks after.

My field kit

- [ ] This journal and a pencil
- [ ] Crayons (for rubbings) and colored pencils
- [ ] Hand lens
- [ ] Zip bag and old book for pressing leaves
- [ ] A phone or camera (with an adult)
- [ ] Our Tree chart from Lesson 2

Journal map

Tools and guides	p. 3-10
Field finds	p. 11-14
Hunts and missions	p. 15-20
Life List and credits	p. 21-22

Where to look

Yards and schoolyards
oaks, maples, sweetgum, crepe myrtle, Bradford pear, anoles

Under logs and boards
red-backed salamanders, brownsnakes, skinks

Pond and creek edges
bullfrogs, leopard frogs, turtles on logs, water snakes

Fences and sunny walls
fence lizards, green anoles, five-lined skinks

Pine woods
loblolly and longleaf pines, box turtles after rain

The museum (Nov 7)
live snakes, turtles, frogs, and salamanders up close

Did you know? North Carolina has more kinds of salamanders than almost any place on Earth, and the Venus flytrap grows wild only within about 75 miles of Wilmington!

North Carolina state symbols

All 7 are on our tournament list. Check the box when you find one in real life, at the museum, or in a new photo. Find all 7 for the State Symbol Seeker badge.

Loblolly pine

On our list: loblolly, longleaf, and shortleaf pine.

State tree ☐ Found: ___

Carolina lily

Orange, spotted petals that curl back.

Wildflower ☐ Found: ___

Scuppernong grape

A bronze-green muscadine grape.

Fruit ☐ Found: ___

Venus flytrap

Catches insects. Grows wild only near Wilmington.

Carnivorous ☐ Found: ___

Eastern box turtle

Can close its shell like a box.

Reptile ☐ Found: ___

Pine Barrens treefrog

Green with a purple stripe on its side.

Frog ☐ Found: ___

Marbled salamander

Black with white or silver bands.

Salamander ☐ Found: ___

Symbol hunt

Loblolly, longleaf, and shortleaf pines all count as the state tree.

Tip: the Venus flytrap is a leaf that snaps shut when 2 trigger hairs are touched.

Say all 7 from memory: _____

Reptile or amphibian?

Both are **herps**. Reptiles (lizards, snakes, turtles, alligators) have dry scales. Amphibians (frogs, toads, salamanders) have moist skin and most start life in water.

Clue	Reptile	Amphibian
Skin	Dry, with scales or plates	Smooth or bumpy, moist, no scales
Eggs	Leathery shell, laid on land	Soft jelly, usually laid in water
Babies	Look like small adults	Often start as larvae (like tadpoles) and change
Breathing	Lungs	Gills when young; lungs and skin later

My T-chart: 5 differences in my own words

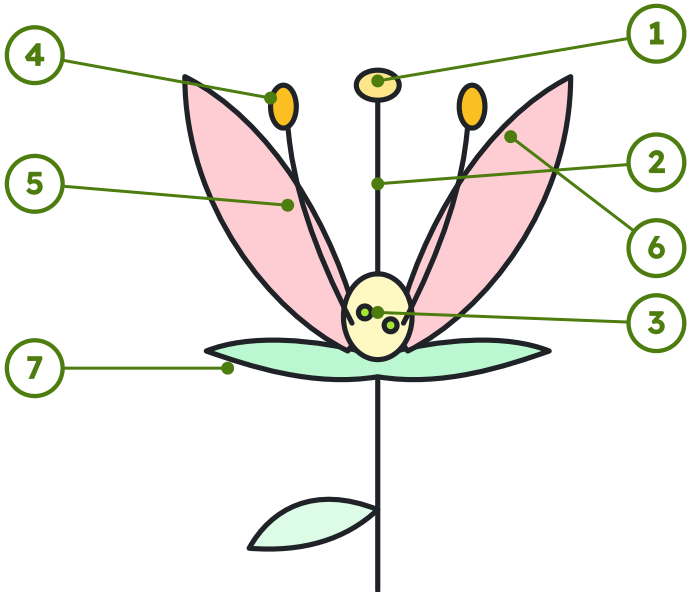

Reptiles	Amphibians

Draw a frog's life cycle

EGG → TADPOLE → FROGLET → FROG

Tricky ones: an eastern glass lizard has no legs but it is a lizard (it has eyelids and ear holes). A toad's skin looks dry and bumpy, but it is still an amphibian.

Label the flower

1 _____

2 _____

3 _____

4 _____

5 _____

6 _____

7 _____

petal **sepal** **anther** **filament** **stigma** **style** **ovary**

The **stamen** = anther + filament (makes pollen). The **pistil** = stigma + style + ovary (makes seeds).

Plant part jobs

Roots	Hold the plant in the soil and take in water and nutrients
Stem	Holds the plant up and carries water and food
Leaves	Make food for the plant using sunlight
Seed	Holds a baby plant (embryo) and its stored food (cotyledon) inside a seed coat
Flower	Makes seeds. Petals attract pollinators; sepals protect the bud
Stamen	Male part: anther (makes pollen) on a thin filament
Pistil	Female part: stigma (sticky top catches pollen), style (tube), ovary (grows into fruit with seeds)

Photosynthesis recipe

[ ] + [ ] + [ ] → [ ] + [ ]

Word bank: sunlight, water, carbon dioxide, sugar (food), oxygen

Herp Collector: alligator, lizards, snakes

All 26 reptiles and amphibians on our list are on these 2 pages.

American alligator

Huge, dark, armored; wide round snout

Fish, turtles, birds; coastal swamps and rivers

Alligator ☐ Spotted: _____

Green anole

Turns green or brown; male has pink throat fan

Insects; shrubs and fences

Lizard ☐ Spotted: _____

Southeastern five-lined skink

Shiny, 5 stripes; young have a blue tail

Insects, spiders; woods, logs

Lizard ☐ Spotted: _____

Eastern glass lizard

Legless lizard with eyelids and ear holes

Insects, snails; sandy fields

Lizard ☐ Spotted: _____

Eastern fence lizard

Rough gray-brown scales; male has blue belly

Insects; sunny pine woods, fences

Lizard ☐ Spotted: _____

Copperhead

Copper head; hourglass bands

Mice, frogs; woods. Live birth

VENOMOUS ☐ Spotted: _____

Cottonmouth

Thick, dark; white inside mouth

Fish, frogs; swamps (east NC). Live birth

VENOMOUS ☐ Spotted: _____

Eastern diamondback rattlesnake

Diamonds on back; rattle

Rabbits, rodents; longleaf pine woods. Very rare

VENOMOUS ☐ Spotted: _____

Black rat snake

Long, shiny black; great climber

Rodents, bird eggs; woods, barns

Snake ☐ Spotted: _____

Dekay's brownsnake

Small, brown, 2 rows of dark spots

Slugs, worms; yards

Snake ☐ Spotted: _____

Eastern hognose snake

Upturned snout; flattens neck, plays dead

Toads; sandy areas

Snake ☐ Spotted: _____

Eastern kingsnake

Black with white or yellow chain bands

Other snakes, even venomous ones

Snake ☐ Spotted: _____

Banded water snake

Dark crossbands; harmless

Fish, frogs; ponds, streams

Snake ☐ Spotted:

Eastern garter snake

Long stripes down the body

Worms, frogs; yards, fields. Live birth

Snake ☐ Spotted:

Snake smarts

NC has 3 venomous snakes on our list. Learn them so you can stay far away.

A **banded water snake** is a harmless look-alike of the cottonmouth.

Any snake: step back and watch.

Herp Collector: turtles, frogs, salamanders

Turtles are reptiles. Frogs, toads, and salamanders are amphibians.

Snapping turtle

Big head, jagged tail, small bottom shell

Almost anything; ponds

Turtle ☐ Spotted: _____

Painted turtle

Smooth dark shell; red and yellow edges

Plants, insects; ponds; basks

Turtle ☐ Spotted: _____

Spotted turtle

Black shell with yellow dots

Insects, worms; wetlands

Turtle ☐ Spotted: _____

Eastern box turtle

High domed shell that closes like a box

Berries, mushrooms, worms; forests ★ state symbol

Turtle ☐ Spotted: _____

Yellow-bellied slider

Yellow belly; yellow patch behind eye

Plants, insects; ponds; basks on logs

Turtle ☐ Spotted: _____

American toad

Dry, warty skin; big bumps behind eyes

Insects, worms; yards, gardens

Frog or toad ☐ Spotted: _____

Pine Barrens treefrog

Green with purple side stripe; sticky toe pads

Insects; boggy sandhills ★ state symbol

Frog or toad ☐ Spotted: _____

Bullfrog

Biggest frog; call sounds like 'jug-o-rum'

Insects, fish, even snakes; ponds

Frog or toad ☐ Spotted: _____

Southern leopard frog

Dark spots, pointed snout

Insects; wet fields, ponds

Frog or toad ☐ Spotted: _____

Marbled salamander

Black with white or silver bands

Worms, insects; forest near ponds; eggs laid in fall ★ state symbol

Salamander ☐ Spotted: _____

Red-backed salamander

Red stripe down the back; no lungs

Tiny insects; under logs; eggs on land, no tadpole

Salamander ☐ Spotted: _____

White-spotted slimy salamander

Black with white spots; sticky slime

Insects; under logs; no lungs

Salamander ☐ Spotted: _____

Herp Spotter

Check the box when you see one in the wild, at the museum, a zoo, or a nature center.

★ = NC state symbol

Amphibians: moist skin. Reptiles: dry scales.

Tree Collector: the 14 trees on our list

Find each tree. Check **leaf** when you press or rub a leaf, and **bark** when you make a bark rubbing. Write where you found it.

Tree	Leaf clue	Bark or seed clue	Got it	Where
American beech	Oval, toothed, straight side veins	Smooth gray bark; small nuts in a prickly husk; dead leaves stay on in winter	☐ leaf ☐ bark	
Black gum	Oval, shiny, smooth edge; turns bright red early in fall	Blocky bark; small dark blue berries	☐ leaf ☐ bark	
Bradford (Callery) pear	Shiny, roundish, wavy edge	White, smelly flowers in early spring; invasive; branches split in storms	☐ leaf ☐ bark	
Crepe myrtle	Small, oval, smooth edge	Smooth bark that peels in patches; pink, purple, or white flower clusters in summer	☐ leaf ☐ bark	
Eastern white pine	Soft needles, 5 in a bundle	Long, thin cones	☐ leaf ☐ bark	
Hickory	Compound: 5 to 9 leaflets on one stem	Hard nut in a husk that splits in 4 parts	☐ leaf ☐ bark	
Loblolly pine state tree	Needles 3 in a bundle, 6 to 9 in. long	Prickly cones 3 to 6 in.; most common pine in NC	☐ leaf ☐ bark	
Longleaf pine state tree	Needles 3 in a bundle, 8 to 18 in. long	Very large cones; young trees look like a grass clump	☐ leaf ☐ bark	
Magnolia (southern)	Large, thick, shiny, evergreen; often rusty fuzz underneath	Huge white flowers; cone-like fruit with red seeds	☐ leaf ☐ bark	
Oak	Many are lobed (rounded or pointed lobes)	Acorns	☐ leaf ☐ bark	
Red maple	3 to 5 lobes, toothed, grow in pairs; red in fall	Winged seeds in pairs (helicopters)	☐ leaf ☐ bark	
River birch	Diamond shape, double-toothed edge	Papery, peeling pink-tan bark; grows near rivers	☐ leaf ☐ bark	
Shortleaf pine state tree	Needles 2 or 3 in a bundle, 3 to 5 in. long	Small cones, about 2 in.	☐ leaf ☐ bark	
Sweetgum	Star shape with 5 points	Spiky brown gumballs	☐ leaf ☐ bark	

Leaf words: simple (one blade), compound (many leaflets), lobed (big bumps), toothed (saw edge), needles (count them in one bundle).

Vines, bushes, and flowers

Six more plants on our list. Poison ivy and kudzu both have 3 leaflets: poison ivy leaflets are smooth and shiny; kudzu leaflets are big and hairy.

English ivy

Evergreen vine; dark green leaves with 3 to 5 pointed lobes

Invasive: climbs and covers trees

invasive ☐ Spotted: _____

Carolina lily

Orange flower with spots; petals curl back

State wildflower

state symbol ☐ Spotted: _____

Eastern poison ivy

Leaves of three; hairy vine; white berries

Oil causes an itchy rash. Never touch!

NEVER TOUCH ☐ Spotted: _____

Kudzu

3 large, hairy leaflets; purple flowers

Invasive vine from Asia; can grow about a foot a day

invasive ☐ Spotted: _____

Scuppernong grape

Vine with round, toothed leaves; bronze-green grapes

State fruit

state symbol ☐ Spotted: _____

Venus flytrap

Leaf ends in a trap with trigger hairs

State carnivorous plant; grows wild only near Wilmington

state symbol ☐ Spotted: _____

Leaf and Bark Rubbings

Put the leaf under this page, vein side up. Rub the side of a crayon over it. For bark, hold the page on the trunk and rub. Label every rubbing.

Leaf rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Bark rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Leaf rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Bark rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Leaf and Bark Rubbings

Put the leaf under this page, vein side up. Rub the side of a crayon over it. For bark, hold the page on the trunk and rub. Label every rubbing.

Leaf rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Bark rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Leaf rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Bark rubbing

Tree: _____ Date: _____
Leaf: ☐ simple ☐ compound ☐ needles Edge: ☐ smooth ☐ toothed ☐ lobed

Field Find #1

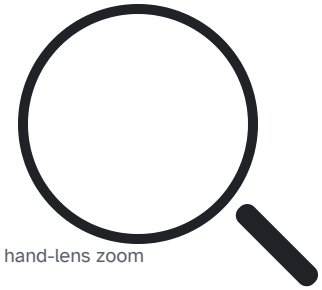

How sure am I? ◯ Guess ◯ Pretty sure ◯ Certain

Date _____ **Time** _____ **Place** _____

Herp Spotter Log

Mission: look for reptiles and amphibians on warm days, after rain, near water, or under boards (with an adult). Watch from a distance and log every herp you see.

Date	Where	Animal	Group	What was it doing?

Frog Chorus (spring bonus)

On a warm evening in March, stand near a pond with an adult. Close your eyes and listen for 5 minutes. Which calls do you hear?

- ☐ **Bullfrog:** deep "jug-o-rum"
- ☐ **American toad:** a long, musical trill
- ☐ **Southern leopard frog:** a clucking chuckle
- ☐ **Pine Barrens treefrog:** a nasal "quonk" (sandhill bogs)

Why herps matter

Snakes eat mice and rats. Frogs and lizards eat insects. Herps are food for birds and mammals. Amphibians are a sign of clean water.

One herp I saw and its job in the food web:

_____

_____

_____

Sprout Scientist: Bean Bag Log

Use this page with Independent Lab I2. Tape 2 bean seeds in a wet paper towel inside a zip bag on a window. Each day, draw what the root and shoot do. Turn the bag upside down on day 5 and predict what happens!

My prediction: when I turn the bag over, the root will _____ because _____.

Day 1 Root ___ cm	**Day 2** Root ___ cm	**Day 3** Root ___ cm	**Day 4** Root ___ cm
Day 5 Root ___ cm	**Day 6** Root ___ cm	**Day 7** Root ___ cm	**Day 8** Root ___ cm
Day 9 Root ___ cm	**Day 10** Root ___ cm	**Day 11** Root ___ cm	**Day 12** Root ___ cm

What I learned

Roots grow toward gravity (**gravitropism**). Shoots grow toward light (**phototropism**). Did your beans do this?

Museum Day: Live Animals

Saturday, November 7. Meet at 10 am at the Daily Planet Cafe. Look for live snakes, turtles, frogs, and salamanders, and for plants from our list.

Herps from our list I saw

Animal	Reptile or amphibian?

A question for a museum scientist

Sketch the coolest herp

Name: _____ Clue: _____

Best thing I learned today

Field Missions

One mission for each Roots & Reptiles meeting. When you finish, show a coach or your Team Captain for initials, then color in the badge.

When	Mission	Badge	Done	Initials
After Fri Oct 9 Lesson 1	Leaf Hunt (Lab I1): collect, press, and name 5 tree leaves from our list.	Leaf Detective	☐	
Sat Nov 7 Museum	Find 2 herps from our list and fill in the Museum Day page.	Museum Explorer	☐	
After Fri Nov 13 Lesson 2	Make 3 bark rubbings from different trees on our list.	Bark Rubber	☐	
After Fri Jan 8 Lesson 3	Bean Bag Log (Lab I2): draw 7 days of roots and shoots.	Sprout Scientist	☐	
After Fri Feb 5 Lesson 4	Spot and log a real herp, or name the 3 venomous snakes and 1 look-alike.	Herp Spotter / Snake Smart	☐	
Fri Mar 5 Lesson 5	Say all 7 NC state symbols from memory and find them on p. 3.	State Symbol Seeker	☐	
Anytime Bonus	Log 4 Field Finds. Point out poison ivy to an adult without touching it.	Field Scientist / Poison Ivy Pro	☐	

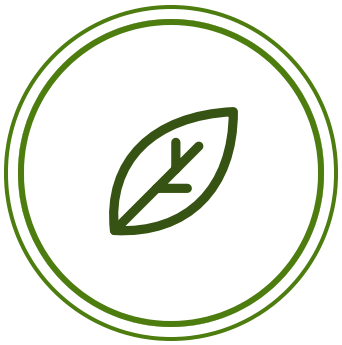

Tournament day: Sat Mar 13, Chatham Regional

- ☐ 2 hand lenses
- ☐ Your 2 reference binders
- ☐ 2 sharp pencils

- **No going back:** finish each station before time is called.
- Use leaf clues (needles, lobes, teeth) and skin clues (scales or moist).
- Flip to your tabs fast: symbols, trees, plants, herps.

My Badges

Color in each badge when you earn it. Earn all 9 to become a **Master Nature Detective**! Your Team Badge Passport has the same badges.

Leaf Detective

Press and name 5 tree leaves

Initials: _____

Museum Explorer

Finish the Museum Day page

Initials: _____

Bark Rubber

3 bark rubbings from our trees

Initials: _____

Sprout Scientist

7 days of the Bean Bag Log

Initials: _____

Herp Spotter

Spot and log a real herp

Initials: _____

Snake Smart

Name the 3 venomous snakes + a look-alike

Initials: _____

State Symbol Seeker

All 7 NC symbols from memory

Initials: _____

Field Scientist

Log 4 Field Finds

Initials: _____

Poison Ivy Pro

Spot poison ivy without touching it

Initials: _____

My Life List

Every new plant or herp you identify goes here, even from the museum or a photo.
